

# SPIE. PHOTONICS WEST

**See What Nobody Else is doing with Glass & Ceramics:  
Photonics West 2017**

IRD Glass is proud to be participating once again in the SPIE Photonics West trade show in San Francisco. From Jan 31 - Feb 2, 2017, we will be exhibiting our full spectrum of custom manufacturing capabilities - from Custom Precision Glass to Ceramics, Sapphire, and Silicon Components.

"Photonics West 2016 was a huge success for IRD Glass," said Todd Anderson, our VP of Sales and Marketing. "We learned that the market for our precision components was growing in a powerful way. Our busy year has borne that out. We are excited about finding new opportunities at Photonics West 2017 and look forward to showcasing our expanded capabilities in sapphire and double-side polishing. We hope to see you in San Francisco!"

**See IRD Glass at Booth #4129**

Stop by Booth #4129 and see what nobody else is doing with glass and ceramics!
