

What Nobody Else is Doing with Glass at Photonics West 2019

IRD Glass is excited to be participating once again in the SPIE Photonics West trade show in San Francisco from February 5th - 7th, 2019.

You can find us at Booth #3400, where we will be exhibiting our full spectrum of custom manufacturing capabilities—from Custom Precision Glass to Ceramics, Sapphire, and Silicon Components.

“Over the last several years, Photonics West has been great for IRD Glass,” said Todd Anderson, our VP of Business Development. “We recently had our first \$1m month, and we are breaking ground on a facility expansion that will nearly double our capacity in April. This year, we will be placing extra emphasis on strategic partnerships. We provide everything from prototype to production, glass to sapphire, and precision optics to silicon nitride. Whether you need design for manufacturability assistance with a brand-new brilliant idea, or cost-down suggestions for a mature product, we want to work with you, side by side, for the life of your product and into the next.”

In 2019, we are also spreading the word about our new Stock Sapphire Windows Program, which includes:

- Next-day shipping
- Significant cost savings compared to custom small volume production
- Immediate small volume pricing—useful when incorporating into your own quotes/budget
- Quick turns on modifications to stock sapphire windows
